

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Gift of Miss Louise Fitz  
May 4, 1922.

## PREFATORY NOTE.

---

The selection of prints here catalogued, although arranged chronologically and by countries, does not aspire to offer a complete, or even a tolerably full, illustration of the history of engraving. To reach this aim, there is neither sufficient space at command, nor are the resources of the Museum rich enough, even with the aid of its friends. All that has been attempted, therefore, has been to give some idea of the technical development of the various multiplying processes invented from the fifteenth to the end of the eighteenth century. It is evident from this statement that the substitute processes and the photo-mechanical processes, which were more especially illustrated in the exhibition held about two years ago, have not been included.

The thanks of the Museum are due, for valuable specimens lent, to Miss Laura Norcross, Mr. Horatio Greenough Curtis, and Prof. Charles Eliot Norton. The John Witt Randall collection has also been largely drawn upon.

In connection with this exhibition the undersigned will deliver a course of eight lectures, on "Old and Modern Methods of Engraving," before the Lowell Institute, beginning on Dec. 19, 1893.

S. R. KOEHLER,  
*Curator of the Print Department.*

## ARRANGEMENT OF THE EXHIBITION.

### FIRST PRINT ROOM.

	Page
I. Wood-cutting (knife work on wood) and relief engraving on metal. <i>Cases 1, 2, 20-31</i> . . .	5

134. The Travellers. After Both.

135. Departure from Regensburg.

136. View of Vienna from the Prater.

137. The Circle in the Thiergarten at Berlin.

NOTE. — Gubitz belongs to the 19th rather than to the 18th century, and his cuts are generally classed with engraving on wood. He began to work at a very early age, however, and he certainly used the knife, even on much later cuts than those shown. Some of his blocks, for a colorprint, cut on wood with the grain running the long way, are in the possession of the Museum of Fine Arts.

## II. WOOD-ENGRAVING. (GRAVER WORK ON WOOD.)

### ENGLAND.

#### CASES 3—7.

THOMAS BEWICK. 1753-1828.

138. Two Vignettes.
